

Liberty Source Options for Summer School

LION for Reading

Our comprehensive K – 12 reading assessment is computer based and easy to administer. Students can be tested at the beginning and end of summer school to show progress in reading level and foundational skills.

Spanish is available for students K – 6.

LION for Math

Currently offered for K – 5 students in English and Spanish, this computer-based assessment gives students the opportunity to show mastery on readiness expectations for the grade level. Each skill has a screening of items from the previous grade level. Teachers can quickly see which students are coming into the instructional unit behind.

STAAR-Styled Mini-Marks

Our curriculum team can provide up to 3 weekly reading assessments (10-20 items) to provide additional reading comprehension opportunities during summer school. For math, we can provide a pre-/post-test covering readiness expectations to track progress. Each of these are available for grades 1 – 8. For districts not using our Trends data management system, the assessments are delivered as print-ready PDFs.

SSI Benchmarks

Students needing additional practice for STAAR retakes can be given one of our complete blueprint-ready benchmarks. The assessments are available in Reading and Math for grades 5 and 8. The assessments are full -length, can include a field test if desired, and match previous year's expectations tested. For districts not using our Trends data management system, the assessments are delivered as print-ready PDFs.
